1981 Journal of Hydronautics Index

Note: A Cumulative Index, referencing all of the papers published during 1980 and 1981 in the AIAA journals and the *Progress in Astronautics and Aeronautics* books, will be offered for sale early in 1982.

How to Use the Index

In the Subject Index, pages 103-104, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 104, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, page 104, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1981, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Helicopters

Naval Architectural Considerations in the Design of a Helicopter **H81-004**

Lighter-than-Airships

Design of Low-Drag Axisymmetric Shapes by the Inverse Method **H81-008**

Fluid Dynamics

Boundary Layers and Convective Heat Transfer-Turbulent

Boundary-Layer Flow at an Air-Water Interface with Spray Entrainment **H81-009**
Self-Induced Separation of Flow in a Hydrodynamic Scoop **H81-001**

Boundary-Layer Stability and Transition

Wall Temperature Estimation for Heated Underwater Bodies **H81-014**

Computational Methods

Design of Low-Drag Axisymmetric Shapes by the Inverse Method **H81-008**
The Normal Force on a Planing Surface **H81-007**

Hydrodynamics

The Spread of High- and Low-Viscosity Chemicals on Water **H81-017**
Impact of Torpedoes on Nets **H81-015**
Wall Temperature Estimation for Heated Underwater Bodies **H81-014**
Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Cross Flow **H81-013**
Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Axial Flow **H81-012**
Optimum Tail Shapes for Bodies of Revolution **H81-011**
Dynamics of an Axially Moving Beam Submerged in a Fluid **H81-010**
Design of Low-Drag Axisymmetric Shapes by the Inverse Method **H81-008**
The Normal Force on a Planing Surface **H81-007**
Vorticity Transport Integral Concept for Determining Wave Forces on Submerged Bodies **H81-006**
Kinematic Barrier for Gravity Waves on Variable Currents **H81-005**
Hydrodynamics of Podded Ship Propulsion **H81-003**
Self-Induced Separation of Flow in a Hydrodynamic Scoop **H81-001**

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Axial Flow **H81-012**
Vorticity Transport Integral Concept for Determining Wave Forces on Submerged Bodies **H81-006**
Self-Induced Separation of Flow in a Hydrodynamic Scoop **H81-001**

Multiphase Flows

Boundary-Layer Flow at an Air-Water Interface with Spray Entrainment **H81-009**

Nonsteady Aerodynamics

Vorticity Transport Integral Concept for Determining Wave Forces on Submerged Bodies **H81-006**

Wave Motion and Sloshing

Kinematic Barrier for Gravity Waves on Variable Currents **H81-005**

Interdisciplinary Topics

Aerospace Technology Utilization

Development of the Bell Halter 110 SES (History of Key Technologies) **H81-002**

Reliability, Maintainability, and Logistics Support

Development of the Bell Halter 110 SES (History of Key Technologies) **H81-002**

Launch Vehicle and Missile (LV/M) Technology

Launch Vehicle Systems

Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Cross Flow **H81-013**
Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Axial Flow **H81-012**

Missile Systems

Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Cross Flow **H81-013**
Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Axial Flow **H81-012**

Marine Technology

Hydrodynamics, Vessel and Control Surface

Estimating Stern Plane Effectiveness on a Body of Revolution **H81-016**
Naval Architectural Considerations in the Design of a Helicopter **H81-004**

Hydrodynamics of Podded Ship Propulsion H81-003

Oceanography, Physical and Biological

Boundary-Layer Flow at an Air-Water Interface with Spray Entrainment H81-009

Propulsion

Hydrodynamics of Podded Ship Propulsion H81-003

Sea Pollution and Containment Control

The Spread of High- and Low-Viscosity Chemicals on Water H81-017

Vessel Design (including Loads)

Optimum Tail Shapes for Bodies of Revolution H81-011

The Normal Force on a Planing Surface H81-007

Naval Architectural Considerations in the Design of a Helicopter H81-004

Development of the Bell Halter 110 SES (History of Key Technologies) H81-002

Structural Mechanics and Materials

Structural Dynamics

Impact of Torpedoes on Nets H81-015

Dynamics of an Axially Moving Beam Submerged in a Fluid H81-010

Chronological Index

H81-001 Self-Induced Separation of Flow in a Hydrodynamic Scoop. Gustave Hokenson, *Dynamics Technology, Inc.* (JH **15**, 1-4, p. 2) Synoptic

H81-002 Development of the Bell Halter 110 SES (History of Key Technologies). John B. Chaplin, *Bell Aerospace Textron/ Bell Halter Inc.* (JH **15**, 1-4, p. 4) Survey Paper

H81-003 Hydrodynamics of Podded Ship Propulsion. Dean A. Rains, David J. VanLandingham, and Herman C. Schlappi, *Ingalls Shipbuilding/Litton Industries*; Chi Chao Hsiung, *Memorial University of Newfoundland*; and Karl L. Kirkman, *Hydronautics, Inc.* (JH **15**, 1-4, p. 18) Article

H81-004 Naval Architectural Considerations in the Design of a Helicopter. J.C. Daidola, *M. Rosenblatt & Sons, Inc.*; D.A. Graham, *Inc.* , *M. Rosenblatt & Sons*; and B.B. Blake, *Boeing Vertol Company* (JH **15**, 1-4, p. 25) Article based on AIAA Paper 79-2013 CP79-12

H81-005 Kinematic Barrier for Gravity Waves on Variable Currents. Wilson C. Chin, *Massachusetts Institute of Technology* (JH **15**, 1-4, p. 30) Article

H81-006 Vorticity Transport Integral Concept for Determining Wave Forces on Submerged Bodies. T.E. Horton and M.J. Feifarek, *University of Mississippi* (JH **15**, 1-4, p. 34) Article based on AIAA Paper 80-0220

H81-007 The Normal Force on a Planing Surface. Peter R. Payne, *Payne, Inc.* (JH **15**, 1-4, p. 39) Article

H81-008 Design of Low-Drag Axisymmetric Shapes by the Inverse Method. Charles Dalton, *University of Houston*; and M.F. Zedan, *Brown & Root, Inc.* (JH **15**, 1-4, p. 48) Article

H81-009 Boundary-Layer Flow at an Air-Water Interface with Spray Entrainment. J. Michael Macha and David J. Norton, *Texas A&M University* (JH **15**, 1-4, p. 55) Article

H81-010 Dynamics of an Axially Moving Beam Submerged in a Fluid. I.A. Taleb and A.K. Misra, *McGill Uiversity* (JH **15**, 1-4, p. 62) Article based on AIAA Paper 80-0705 CP80-04

H81-011 Optimum Tail Shapes for Bodies of Revolution. A.M.O. Smith, T.R. Stokes Jr. and R.S. Lee, *McDonnell Douglas Astronautics Company* (JH **15**, 1-4, p. 67) Article

H81-012 Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Axial Flow. J.V. Rattayya, J.A. Brosseau and M.A. Chisholm, *Lockheed Missiles & Space Company, Inc.* (JH **15**, 1-4, p. 74) Article

H81-013 Potential Flow about Bodies of Revolution with Mixed Boundary Conditions--Cross Flow. J.V. Rattayya, J.A. Brosseau and M.A. Chisholm, *Lockheed Missiles & Space Company, Inc.* (JH **15**, 1-4, p. 81) Article

H81-014 Wall Temperature Estimation for Heated Underwater Bodies. J.J. Eisenhuth and G.H. Hoffman, *Applied Research Laboratory, The Pennsylvania State University* (JH **15**, 1-4, p. 90) Article

H81-015 Impact of Torpedoes on Nets. Andrzej Wortman, *WARS, Inc.* (JH **15**, 1-4, p. 97) Engineering Note

H81-016 Estimating Stern Plane Effectiveness on a Body of Revolution. C. von Kerczek, W. Shih and K.J. Victoria, *Science Applications, Inc.* (JH **15**, 1-4, p. 99) Engineering Note

H81-017 The Spread of High- and Low-Viscosity Chemicals on Water. T.R. Sundaram, *T.S. Associates, Inc.* (JH **15**, 1-4, p. 100) Engineering Note
